

Chemical Resistance List PolymerMetall®

A huge number of different parameters can influence the resistance. We advise before the application of polymer materials always to carry out pre-tests under consideration of the later local operation conditions for the purpose of examination/confirmation of the resistance. A special assessment is required, if mechanical, chemical and thermal stresses occur simultaneously. The assessments of the chemical resistances listed on the following pages shall serve merely as orientation.

Generally higher temperatures can significantly affect the chemical resistance depending on the medium. Since diffusion processes are temperature dependent, the information concerning the chemical resistances are only valid for the indicated temperatures

Test data

Curing of the samples:	9 days at room temperature (if not specified otherwise)
Chemical temperature:	Room temperature (if not specified otherwise)
Test duration (Exposure time of chemicals):	30 days (if not specified otherwise)

Legend to symbols to the table in the following pages:

[Chemical Resistance]

- + = resistant
- 0 = conditionally resistant
- = not resistant

[Footnote]

*¹ Further details concerning the influence of liquids on the strength of bonded compositions can be found in the technical data sheet of XETEX® BD.

Note

A good chemical resistance is obtained after curing over 9 days at room temperature. Generally warm curing improves the chemical resistance and additionally considerably shortens the curing time which is necessary for a high chemical capacity.

Example: Curing 24 h at room temperature + curing 20 h at 30 – 40 °C
(alternatively)
Curing 24 h at room temperature + curing 2 h at approx. 65 °C

It is important that not only the polymer metal alone, but also the corresponding substrate is warmed up at the same time.

The product information and instructions provided in this leaflet were prepared to the best of our knowledge and serve information purposes only. We recommend that appropriate tests are carried out prior to application in order to ensure that the products and methods fulfil the purpose desired by the user. In this procedure, the given data may serve as a basis. Application and processing of the products lie outside our possible control and are therefore the sole responsibility of the user. The chemical resistance of a material is considerably affected when mechanic or physical or thermal stresses take effect additionally.

Natriumaluminat	Sodium aluminate	NaAlO_2	+		+		+	+	+	
Natriumbicarbonat	Sodium bicarbonate	NaHCO_3	+		+		+	+	+	
Natriumbisulfat	Sodium bisulfate	NaHSO_4	+		+		+	+	+	
Natriumbisulfit	Sodium bisulfite	NaHSO_3	+		+		+	+	+	
Natriumbromid	Sodium bromide	NaBr	+	+	+	+	+	+	+	
Natriumcarbonat	Sodium carbonate	Na_2CO_3	+	+	+	+	+	+	+	
Natriumchlorat	Sodium chlorate	NaClO_3	+	+	+	+	+	+	+	
Natriumchlorid	Sodium chloride	NaCl	+	+	+	+	+	+	+	
Natriumchromat	Sodium chromate	NaCrO_4	+		+		+	+	+	
Natriumcyanid	Sodium cyanide	CNNa	+		+		+	+	+	
Natriumfluorid	Sodium fluoride	NaF	+		+		+	+	+	
Natriumhydroxid	Sodium hydroxide	NaOH	40% +	-	40% +	-	40% +	40% +	10% + 30% + 40% + 50% +	
Natriumhydroxid (bei 50 °C)	Sodium hydroxide (at 50 °C)	NaOH						50% +		
Natriumhypochlorit (16%) (auch Bleiche, Bleichmittel)	Sodium hypochlorite (16%) (also Bleach)	NaClO	0	-	0	-	0	0	+	Exposure time 90 days
Natriumdisulfit (auch Natriumpyrosulfit)	Sodium metabisulfite (also Sodium pyrosulfite)	$\text{Na}_2\text{S}_2\text{O}_5$	+	40% +	+		+	+	+	
Natriummethaphosphat	Sodium metaphosphate	$\text{Na}_n\text{H}_2\text{P}_n\text{O}_{3n+1}$	+		+		+	+	+	
Natriummetasilicat	Sodium metasilicate	Na_2SiO_3	+		+		+	+	+	
Natriumnitrat	Sodium nitrate	NaNO_3	+	+	+	+	+	+	+	
Natriumphosphat	Sodium phosphate	$\text{Na}_3\text{PO}_4 \times 12\text{ H}_2\text{O}$	+	+	+	+	+	+	+	
Natriumpyrosulfit siehe Natriumdisulfit	Sodium pyrosulfite see Sodium metabisulfite									
Natriumsilicat	Sodium silicate	$\text{Na}_2\text{Si}_3\text{O}_7$	+		+		+	+	+	
Natriumsulfat	Sodium sulfate	Na_2SO_4	+		+		+	+	+	

Chemical (German)	Chemical (English)	Formula	MM-metal SS- steelceramic with Hardener yellow	MM-metal SQ	MM-metal OL- steelceramic with Hardener yellow	MM-metal UW	XETEX BD*1	Ceramium	Ceramium CH with Hardener CH1	Ceramium CH with Hardener CH2	Notes
Natriumsulfid	Sodium sulfide	Na ₂ S	+		+		+	+	+		
Natriumborat (auch Borax)	Sodium tetraborate decahydrate (also Borax)	Na ₂ B ₄ O ₇ x 10 H ₂ O	+	+	+	+	+	+	+		
Stearinsäure	Stearic acid	C ₁₈ H ₃₆ O ₂	+	+	+	+	+	+	+	+	
Styrol	Styrene	C ₈ H ₈	+	-	+	-	+	+			+
Schwefeldioxid	Sulphur dioxide	SO ₂	+		+		+	+	+		
Schwefeltrioxid	Sulphur trioxide	SO ₃	+		+		+	+	+		
Schwefelsäure	Sulphuric acid	H ₂ SO ₄	10% + 20% + 50% 0	10% + 20% + 50% 0	10% + 20% + 50% 0	10% + 20% + 50% 0	10% + 20% + 50% 0	10% + 20% + 50% 0	20% + 30% + 60% + 80% + konz. +		
									konz. +		Exposure time 90 days
Tetrachlormethan siehe Tetrachlorkohlenstoff	Tetrachloromethane see Carbon tetrachloride										
Zinchlorid	Tin chloride	-	+		+		+	+	+		
Zinn(II)-chlorid	Tin(II) chloride	SnCl ₂	+		+		+	+	+		
Zinn(IV)-chlorid	Tin(IV) chloride	SnCl ₄	+		+		+	+	+		
Toluol siehe Methylbenzol	Toluene see Methylbenzene										
Fischtran	Train oil	-	+	+	+	+	+	+	+		
Transformatoreöl	Transformer oil	-	+	+	+	+	+	+	+	+	
Trichlorethan	Trichloroethane	C ₂ H ₃ Cl ₃	+	-	+		+	+	0	+	
Trichlorethen siehe Trichlorethylen	Trichloroethylene see Trichloroethylene										
Trichlorylphosphat	Trichloroethyl phosphate	C ₆ H ₁₂ Cl ₃ O ₄ P	+	+	+	+	+	+	+		
Trichlorethen (auch Trichlorethen)	Trichloroethylene (also Trichloroethene)	C ₂ HCl ₃	+	-	+	-	+	+	0	+	
Trichlormethan (siehe Chloroform)	Trichloromethane (see Chloroform)										
Triethanolamin	Triethanolamine	C ₆ H ₁₅ NO ₃	+		+		+	+	+		
Trifluortrichlorethan	Trifluorotrichloroethane	C ₂ Cl ₃ F ₃	+	+	+		+	+			+
Trikresylphosphat	Triorthocresylphosphate	C ₂₁ H ₂₁ PO ₄	+	+	+		+	+	+		
Kaliumphosphat (auch Trikaliumphosphat)	Tripotassium phosphate (also Potassium phosphate, tribasic)	K ₃ PO ₄	+	+	+	+	+	+	+		
Terpentin	Turpentine	-	+		+		+	+			+
Terpentinöl	Turpentine oil	-	+	+	+	+	+	+	+	+	
Urin	Urine	-	+	+	+	+	+	+	+		
Gemüsesaft	Vegetable juice	-	+	+	+		+	+	+		
Pflanzenöle, allgemein	Vegetable oil, general	-	+	+	+	+	+	+	+		
Essig	Vinegar	-	+		+		+	+	+		
Abwasser	Waste water	-	+	+	+	+	+	+	+		
Wasser	Water	H ₂ O	+	+	+	+	+	+	+		
Wasser (destilliert)	Water (distilled)	H ₂ O	+	+	+	+	+	+	+		
Wasser (Fluß-, Leitungs-, Meerwasser)	Water (River, tap, sea water)	-	+	+	+	+	+	+	+		
Wein	Wine	-	+	+	+	+	+	+	+		
Weinsäure	Wine acid	C ₄ H ₆ O ₆	+	+	+	+	+	+	+		+
Xylol	Xylene	C ₈ H ₁₀	+	+	+	+	+	+	+		+
